# INTRODUCTION & PROBLEM OVERVIEW

01

# PROBLEM STATEMENT

- Healthcare systems often struggle with:
- Manual and slow clinic onboarding
- No unified platform for scheduling & appointments
- Weak user authentication and lack of 2FA
- Patients facing difficulty in finding specialties, clinics, doctors, and available slots
- No AI guidance to support patients in their journey

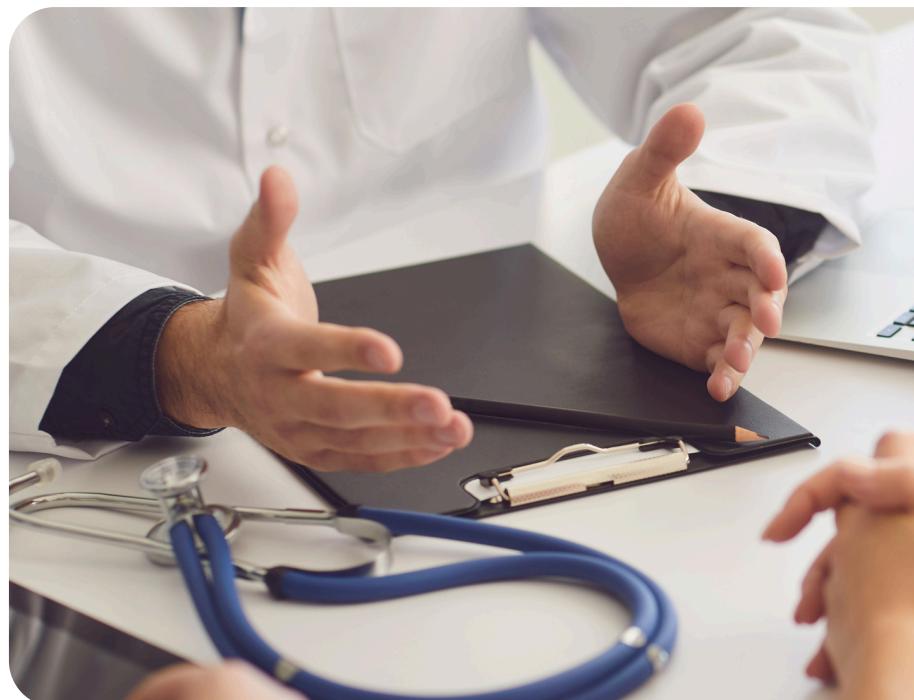

## SOLUTION & SYSTEM ARCHITECTURE

02

# OUR SOLUTION

- A modular backend that provides:
- Central Authentication & Security
- Controlled Clinic Registration Workflow
- Full Clinic Management Panel
- Doctor scheduling & auto-generated appointment slots
- Smooth Patient browsing and booking
- Integrated AI assistant for guidance, recommendations, and appointment support

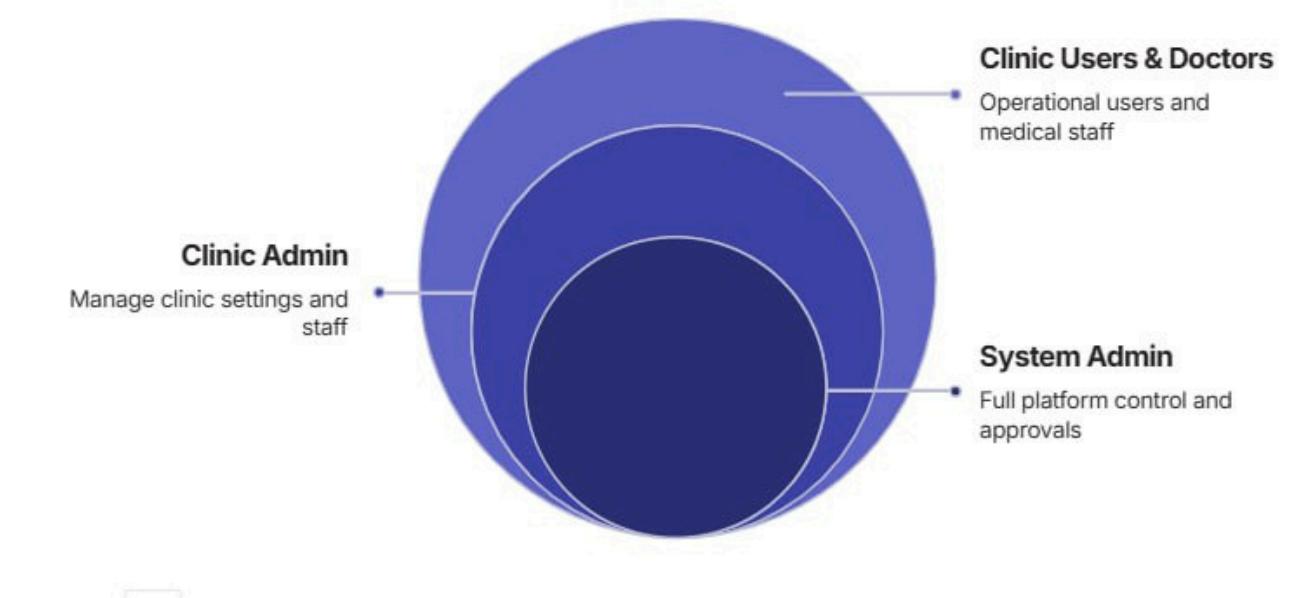

# AUTHENTICATION & SECURITY

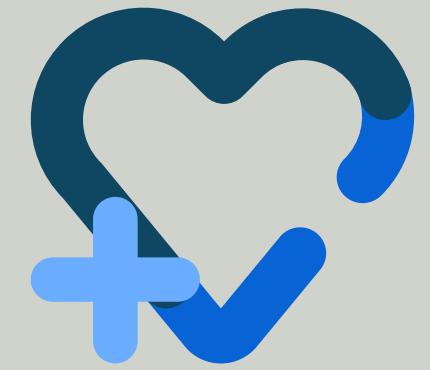

- Our system provides a complete and secure auth module:
- Register + Email Verification
- Login with OTP
- Two-Factor Authentication (2FA)
- Password reset with OTP verification
- Refresh token system
- Role-based access control for all operations

# SYSTEM ROLES

- **System Admin** — full system control, approves/rejects clinic requests
- **Clinic Admin** — submits clinic request, manages clinic after approval
- **Clinic Users** — staff accounts inside each clinic
- **Doctors** — assigned schedules and appointment slots
- **Patients** — view clinics, doctors, schedules, and book appointments

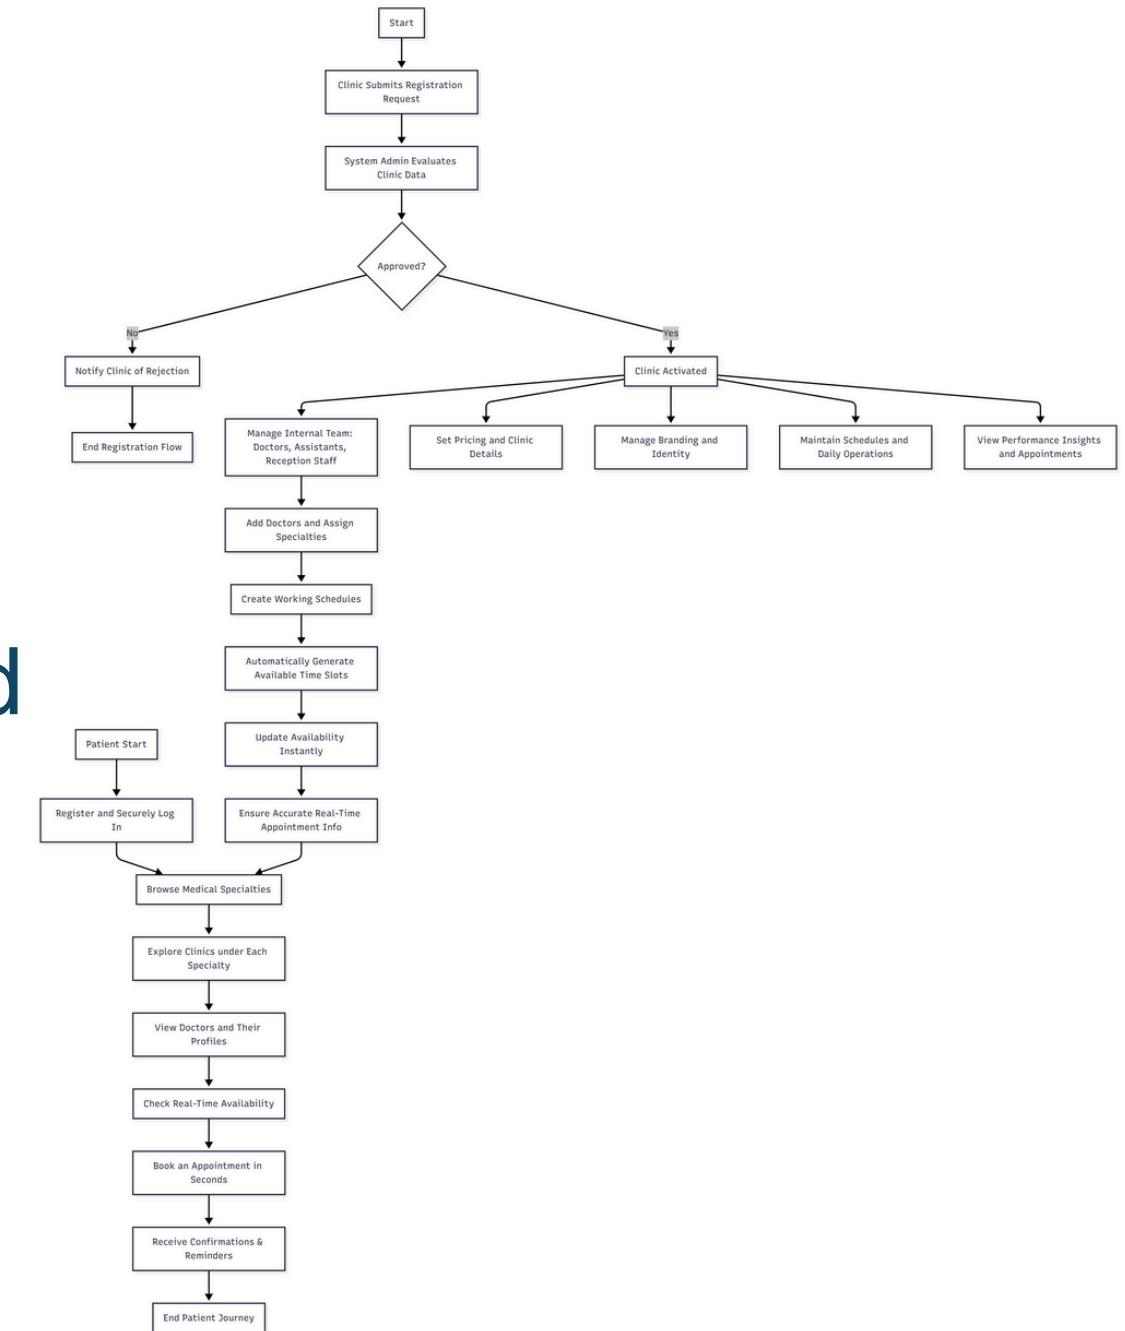

## PROCESS FLOW

03

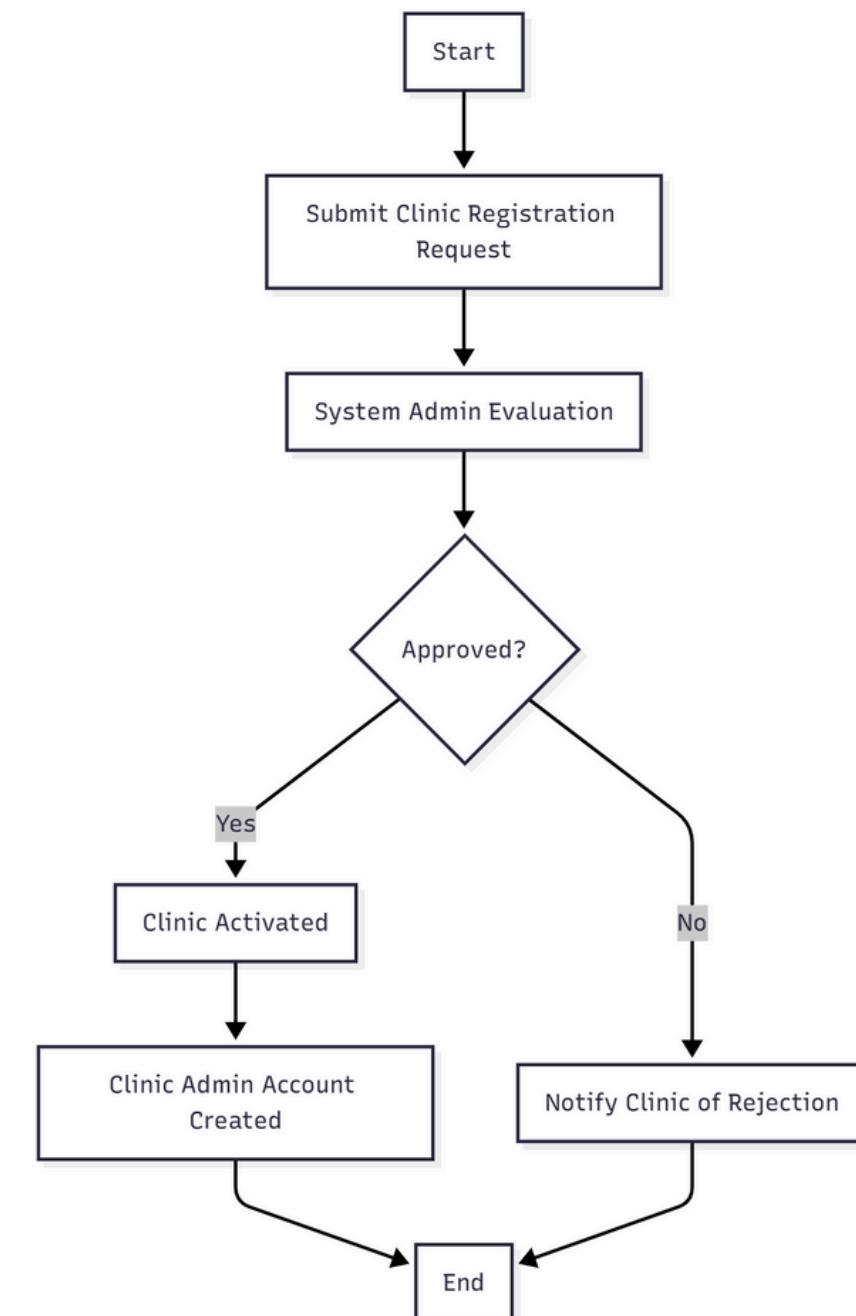

# SYSTEM FLOW

- A clinic requests to join the platform
- The system admin reviews and approves or rejects
- An approved clinic becomes active in the ecosystem
- Clinic admin adds doctors and staff
- Doctors' schedules and available time slots are created
- Patients register and access the system
- Patients browse specialties → clinics → doctors
- They view available times and book appointments
- AI Assistant guides patients and enhances the service experience

# CLINIC REGISTRATION FLOW

- Clinics start by submitting a digital registration request
- The system admin evaluates the clinic's data
- Once approved:
- The clinic becomes part of the platform
- A clinic administrator account is created
- This ensures quality, legitimacy, and controlled access to the healthcare network.

# CLINIC MANAGEMENT CAPABILITIES

Once activated, each clinic can:

- Manage its internal team (doctors, assistants, reception staff)
- Set pricing and clinic details
- Manage its branding (like clinic logo and identity)
- Maintain schedules and daily operations
- View performance insights (appointments, demand patterns)

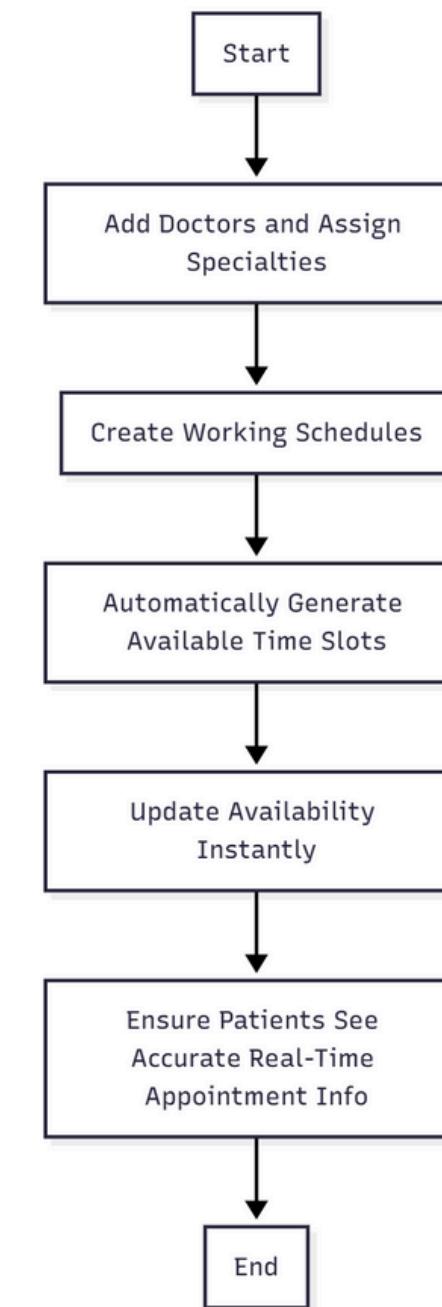

# DOCTOR & SCHEDULE MANAGEMENT

Clinics can:

- Add doctors and assign medical specialties
- Create their working schedules
- Automatically generate available time slots
- Update availability instantly

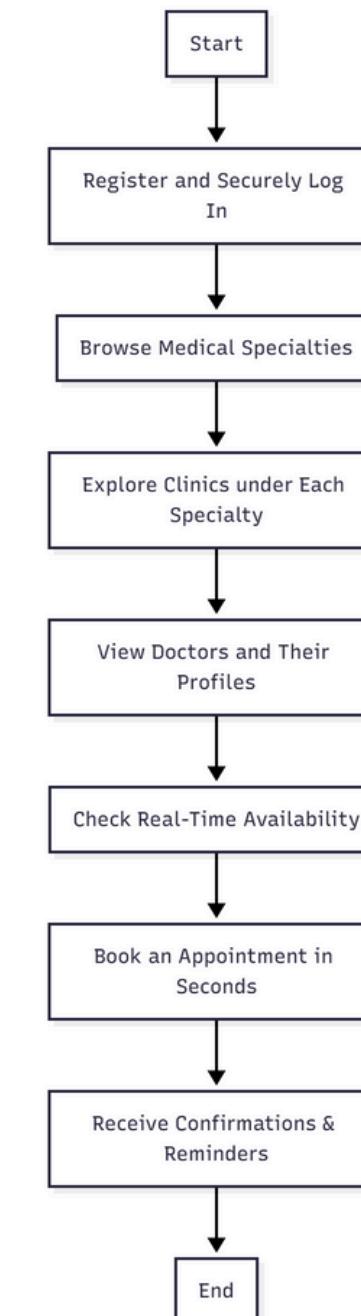

This ensures patients always see accurate, real-time appointment information.

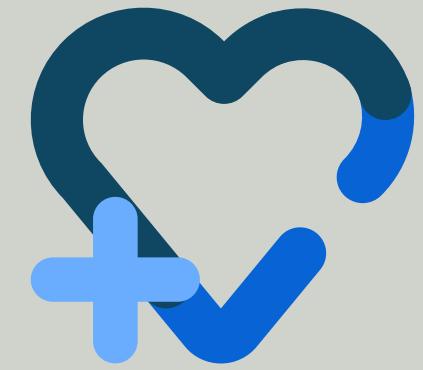

# PATIENT JOURNEY

Patients can:

- Register and securely log in
- Browse medical specialties
- Explore clinics under each specialty
- View doctors and their profiles
- Check real-time availability
- Book an appointment in seconds
- Receive confirmations & reminders

## OPERATIONAL EFFICIENCY

04

# OPERATIONAL EFFICIENCY

- Significantly reduces paperwork by digitizing all operational processes.
- Minimizes human errors through automated workflows and standardized procedures.
- Saves valuable time for both medical staff and patients, resulting in faster service delivery.
- Provides real-time visibility into clinic performance, enabling more effective monitoring and control.

# FUTURE ENHANCEMENTS

- AI-Powered Appointment Booking (Chat-Based)
- AI Triage & Medical Guidance
- Voice Assistant Integration
- Smart Doctor Recommendation Engine
- EMR Integration
- Intelligent Notifications & Reminders
- Real-Time Chat with Clinic Staff
- Dynamic Pricing Optimization (AI-Based)

# CONCLUSION

- Our platform represents a major step toward modern, efficient, and transparent healthcare services.
- It empowers clinics, enhances patient experiences, and supports decision-makers with reliable insights — paving the way for a smarter healthcare ecosystem across the region.

**THANK YOU  
AND STAY HEALTHY**
